

THE ART OF CYBER EXPRESS: Game Art Collection

ANNIE YANG, CHATGPT, MIDJOURNEY

BACKGROUND

In a not-too-distant future, the world is ruled by powerful corporations who use advanced technology to control every aspect of society. In this world, there exists a secret train system, known as the "Cyber Express", which travels through time and space. Rumors abound that the train holds the key to the corporations' power and a group of rebels have banded together to find it and bring about their downfall.

Lena, a street-smart smuggler and weapons expert, has her own reasons for taking down the corporations. She joins the rebels to settle a score and bring about justice for those who have been wronged.

One of the futuristic cities in "Cyber Express" is a sprawling metropolis filled with towering skyscrapers, advanced technology, and a bustling population. The city is one of the first stops on the journey of the Cyber Express and offers a stark contrast to the post-apocalyptic wastelands and other dangerous locations the rebels will visit later on.

The city is a hub of advanced technology and is controlled by one of the powerful corporations that rule the world. Everywhere the player looks, they will see sleek and stylish robots, flying vehicles, and other advanced tech that is commonplace in this city.

Despite the high-tech appearance, the city is not without its dangers. The corporation that controls the city has a strong grip on the population, using advanced security systems and robots to keep the citizens in line. The rebels will have to be careful as they navigate through the city, as they are wanted by the corporation and are at risk of being discovered and captured.

The city is also home to a thriving black market, where the rebels can purchase weapons and supplies to aid them on their journey. In the city's underbelly, the rebels will meet with street-smart smugglers and other shady characters who are willing to help them for a price.

GAME SETTING

THE WORLD MAP

In "Cyber Express", the world map is not a traditional map of geographical locations, but rather a map of time and space. The Cyber Express travels through different time periods and locations, each offering its own unique challenges and dangers.

The map is divided into several time periods, ranging from futuristic cities to post-apocalyptic wastelands. Each location is visually distinct and offers its own set of obstacles and enemies. For example, in a futuristic city, the rebels may encounter highly advanced robots and security systems, while in a post-apocalyptic wasteland, they may face mutated creatures and dangerous environmental hazards.

As the rebels travel through time and space, the map will change and evolve to reflect their progress. It will show the location of the Cyber Express as it travels from one time period to the next and will display any dangers or objectives that lie ahead. The map will be an essential tool for the rebels as they navigate through the journey and uncover the secrets of the Cyber Express.

MARCUS, a former street racer and skilled hacker who has joined the rebels in their cause. With a troubled past and a thirst for adventure, Alex is the perfect candidate to lead the mission on the Cyber Express.
